

Lisa Levesque
Certified Business Performance Coach
FocalPoint

Be more, Do more, Have more, Know more, Earn more!

I'm in the business of business. On a daily basis I coach & train business owners, professionals and teams to Be, Do, Have, Know & Earn more in their professional and business lives.

I believe that the most successful people are those who achieve balance in their lives. They work hard, but they also find time to explore the things that motivate them personally. By working together to make your business the best that it can be, we will find the time for you to become the best version of you.

As a Certified FocalPoint Business Coach I have extensive professional experience in several key areas associated with the development and growth of businesses and teams of all sizes including:

- Strategic Planning
- Business Development
- Marketing
- Leadership & organizational design

My goal is to have my clients achieve levels of success that they never imagined possible in their business.

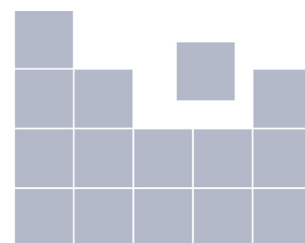

As a Certified Business Coach in Massachusetts, I work with business leaders and entrepreneurs to create a Vision and a Plan, and then Coach and Train them for effective execution, encouraging them achieve their personal and business goals at a higher level and faster than they could imagine on their own.
